Survey design

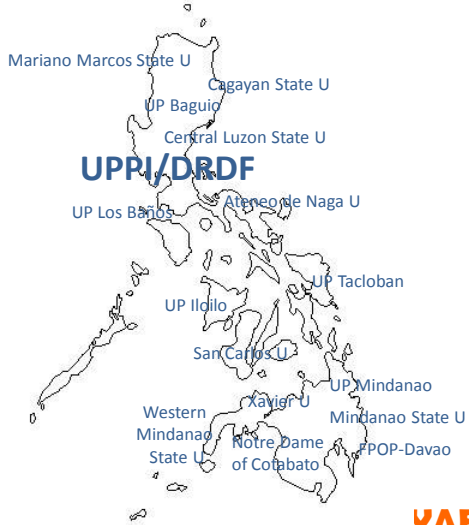

- Sampling domain: Region
- Sample size per region: About 1,000 respondents
- Sampling design:
 - Multistage, stratified random sampling;
 - In each region, barangays were stratified into S, M, L with the size of the youth population as the stratification variable;
 - Within each stratum, barangays were selected with probability proportional to the population size;
 - In each barangay, 15 HHs were selected using systematic random sampling;
 - All eligible members of the sample household (15-24 years old) were interviewed.
